

ENECON

ESPON Evidence in a North European Context

**ENECON III Post-graduate Workshop
“Integrated Territorial Management and Governance”
Aalborg, Denmark, March 28, 2014**

A total of 28 master’s students, postgraduate students and lecturers from the Nordic-Baltic region gathered at the Utzon Centre in Aalborg to discuss territorial governance, spatial planning and policy, and polycentric development, amongst other relevant themes and domains associated with evidence from ESPON projects such as TERCO, METROBORDER, LUPA, TOWN, TANGO, and others. ESPON-ENECON speakers and doctoral students from the Nordic-Baltic region debated evidence-based policy making approaches concerning governance and land-use patterns in border regions, strategic and spatial visions under emerging regionalization, stakeholder involvement in strategic spatial planning, and the emergence of new plans and instruments for the design of urban regions. ESPON-ENECON partners Daniel Galland (Aalborg University) and Antti Roose (University of Tartu) regard this successful workshop as a significant learning outcome for the future ESPON 2020 programme.

The ENECON project is one of the Transnational Networking Activities in the ESPON 2013 Programme aiming to disseminate ESPON findings in the Northern European context as well strengthening the Nordic-Baltic community on territorial development and cohesion.

The programme and workshop presentations are available at [ENECON](#).
